

Meat Processing Quality Assurance Specialist

About Us

Little Colorado Meats is a newly formed business who will harvest and process USDA inspected meats. It is LCM's goal to connect underserved and food insecure communities and residents with healthier and more accessible, locally produced meats and at the same time expand market opportunities for local livestock produce. Located in the beautiful White Mountains of Arizona in Eagar, we will provide our local producers a place to have their animals harvested and packaged.

Job Role & Summary

The role of our Meat Processing Quality Assurance Specialist will be to assure all products are handled in a safe and clean manner from the time of butchering to the storage in the freezer. This person will need to be able to work in cold freezing temperatures and be able to stand for long periods of time.
